

SUBSEA SERVICES

Diving Support Vessel Boka Da Vinci

WHO WE ARE

We are Boskalis and we create new horizons for our stakeholders. As a leading global dredging contractor and marine and subsea services provider, we offer a unique combination of experts, vessels and services.

SUBSEA SERVICES

As your subsea services provider, we deliver tailored, packaged solutions utilising fully equipped diving and construction support vessels in conjunction with our in-house project management and engineering capability. We pride ourselves on our ability to offer planned and responsive support for IRM, SURF and decommissioning activities.

CUSTOMER FOCUS

We work with our customers to understand and align with their drivers and challenges. A one team approach is at the heart of everything we deliver. We spend time and effort selecting the right project personnel to culturally fit and deliver on project expectations.

SAFETY

Our work goes beyond the provision of services. With safety as our core value, Boskalis has embraced safety within its culture without compromise. This is the essence of 'NINA', our No Injuries, No Accidents program. NINA rests on five values and five rules. Together they ensure that safety can be openly discussed, leading to a clear and very positive development in how safety is perceived

WE WILL DELIVER

"Our driver is to provide best value to our clients, understanding the importance of cost efficiency and maximizing operations with minimum downtime. The backbone to this is ensuring safety and environment are at the forefront of our thinking and delivery every day. We have the right team, assets and approach to make a difference."

YOUR IRM SOLUTIONS PROVIDER

Asset integrity is key to sustainable production. At Boskalis we understand the value in gathering quality data in order to plan for critical maintenance or respond rapidly to a repair need. Our team of highly skilled engineers will select the most appropriate inspection tools to generate the best quality data and interpret the results to produce concise value driven reports.

We are skilled in planning and executing cost effective repairs to subsea facilities, whether that be localized repairs or the full replacement of components. Whatever the challenge, we will provide a safe, reliable and cost-effective solution to ensure that hydrocarbon production is maintained.

YOUR SURF CONTRACTOR

We are fully equipped to deliver EPIC subsea tieback solutions. At the heart of our organization our significant, multidisciplinary and experienced engineering and project management resource works with our customers and will select the optimum solution to offer a safe, reliable and cost-effective solution to deliver hydrocarbons to host production facilities. This includes management of major procurement packages including but not limited to flexibles, umbilicals and manifolds.

Boskalis provides integrated solutions thanks to our unique and extensive range of marine services. For subsea tiebacks we have the ability to make use of our enhanced capabilities in rock dumping as well as trenching and ploughing solutions.

"CSV Polar Onyx compliments our strong track record in delivering flexible riser and flowline installation projects and enhances our ability to lay longer lengths of flowlines and install heavier structures. We also have the capability to install risers and flowlines in deeper water with our 275T Vertical Lay System."

YOUR DECOMMISSIONING PARTNER

Our turnkey removal solutions cover the entire decommissioning process. With our extensive fleet, specialized equipment and in-house expertise, we provide an innovative and cost-effective solution with a focus on safety and reduction of environmental impact.

As an EPRD (Engineering, Preparation, Removal & Disposal) contractor, our services cover the offshore survey, preparation, engineering, cutting, removal and transport campaigns for all kinds of seabed infrastructure, platform jackets and topsides. Finally we take care of environmentally conscious onshore dismantling, recycling and disposal.

Using state of the art techniques and equipment we will return the seabed to its original state. In the case that it is determined best practice to leave pipelines and structures in place we have the ability to provide trenching and rock dumping services which will ensure stabilization and protection.

Afterwards we will conduct the appropriate surveys to meet environmental and regulatory requirements.

PROJECT HIGHLIGHTS

With decades of experience, our subsea services activities have amassed an enviable global track record; we recognize the importance of engaging a trusted contractor to support operations.

EPCI CONSTRUCTION WORKS

Boka Atlantis

Scope: Subsea disconnection and reconnection of existing field, tie-in spools, SSIV, mechanical connectors. Engineering, fabrication and installation works.

Location: North Sea, Danish Sector

INSPECTION, REPAIR, MAINTENANCE

Constructor

Scope: Year around IRM works consisting of Air Diving, Saturation Diving, ROV Interventions.

Location: Persian Gulf, Middle East

SURF INSTALLATION

Boka Atlantis

Scope: Cut out a section of rigid pipe and replace with a new section. Installation of 7.5km flexible water injection flowline. Seabed preparation, rock dump and commissioning and testing activities.

Location: UK North Sea

SUBSEA DECOMMISSIONING

Boka Topaz

Scope: Multiyear campaign of SAT and Air diving including daughter craft. Disconnection of multiple satellites and platforms, removal of conductors, umbilicals and numerous wellheads and offshore structures. Flushing of 2,000 kilometer of pipeline.

Location: UK Southern North Sea

OUR FLEET

To support our subsea services activities we have the following Diving Support Vessels (DSVs) and Construction Support Vessels (CSVs) in our owned fleet or on long term charter.

DP2 BOKA Atlantis Twin Bell Sat, Air, ROV

DP2 BOKA Topaz, Twin Bell Sat, Air, ROV

DP2 BOKA Da Vinci, Twin Bell Sat, Air, ROV

LET'S TALK

WHY BOSKALIS SUBSEA SERVICES?

- Industry leading, safe and quality service
- More than 40 years of experience in offshore diving projects
- Proven track record in the North Sea, Middle East, Africa and Americas
- Dedicated specialist Diving Support Vessel (DSV) fleet
- Reliable and flexible
- Responsive and collaborative approach
